

## Memorandum

*Flex your power!  
Be energy efficient!*

To: K.N. GUNALAN  
PARSONS BRINCKERHOFF

Date: March 23, 2010

File: 04-SF-PM 8.3/9.4  
04-163711  
Doyle Drive Replacement  
P3 for Contract #5, 6, and 7

From:  TIMOTHY POKRYWKA  
Chief  
Office of Geotechnical Design – West  
Geotechnical Services  
Division of Engineering Services

Subject: Geotechnical Documents Disclaimer

All field boring logs are un-checked raw data and have not been revised based on the laboratory data.

The field boring logs have not been reviewed for required Caltrans QA/QC process. Additional subsurface investigation to supplement available data should be conducted if it is necessary for the foundation design.

The preliminary foundation reports (PFR) were prepared before subsurface investigation was conducted. The preliminary recommendations contained in these reports need to be checked based on subsurface investigation results and current related foundation design.

The Concessionaire is recommended to use all the information for reference purposes only. This information might be invalidated, wholly or partially, by changes outside of our control. No warranty, expressed or implied, of merchantability or fitness, is made or intended in connection with our work. The Concessionaire is responsible to verify them.

If you have any questions or need additional information, please call Tung Nguyen at (510) 622-1775 or me at (510) 286-4840.
